PROFILE

Passionate and driven Junior Full Stack Developer with a relentless commitment to excellence and a strong desire for continuous growth. I possess a solid foundation in web development principles and strive to contribute my expertise to cutting-edge projects while expanding my skill set. With a proven ability to solve complex problems and collaborate seamlessly within a team, I am dedicated to delivering exceptional results.

SKILLS

Front-End:
- Mastery of HTML5, CSS3, and JavaScript, with an innate understanding of advanced front-end concepts.

- Extensive experience with front-end frameworks like Bootstrap, Foundation, and Material-UI, elevating user interfaces to new heights.

- Adept at incorporating user experience (UX) and user interface (UI) design principles, crafting intuitive and visually captivating web applications.

Back-End:
- Proficient in server-side programming languages such as Node.js, Python, and Java, ensuring seamless back-end functionality.

- In-depth knowledge of databases like MySQL, MongoDB, and PostgreSQL, facilitating efficient data management and retrieval.

- Advanced understanding of RESTful API design and implementation, enabling seamless integration with external services.

Full Stack Development:
- Exceptional ability to seamlessly bridge front-end and back-end technologies, creating robust and dynamic web applications.

- Well-versed in version control systems like Git and proficient in utilizing essential project management tools, ensuring smooth collaboration and project delivery.

- Demonstrated willingness to stay ahead of the curve, eagerly adapting and applying emerging technologies and concepts.

PROJECTS

- Developed a highly responsive website using HTML5, CSS3, and JavaScript, showcasing meticulous attention to detail and exceptional front-end skills.

- Implemented intricate back-end functionalities using Node.js and Express, expertly handling API requests and executing database operations.

- Collaborated seamlessly with cross-functional team members to ensure flawless project delivery, consistently meeting and exceeding project requirements.

- Created a captivating e-commerce web application utilizing cutting-edge front-end technologies like Bootstrap and JavaScript, effectively applying UI/UX design principles to enhance user experience

- Developed comprehensive server-side functionalities using Node.js and Express, including advanced user authentication and authorization mechanisms.

- Seamlessly integrated a MySQL database to store and retrieve data, expertly leveraging back-end skills to drive efficient data management.
